

UnitedHealthcare Is Putting Patients at Risk

UnitedHealthcare has walked away from its Medicare Advantage members who rely on Lehigh Valley Health Network (LVHN), part of Jefferson Health.

As of January 26, United's Medicare Advantage members who use LVHN are out of network because United has imposed reimbursement cuts that violate our contracted agreement – cuts we are actively challenging through legal channels.

Immediately, our physicians identified cancer patients whose care is now at risk – including **34 patients whose upcoming chemotherapy was jeopardized** by United's actions. We asked United to work with us to ensure continuity of care for people fighting for their lives.

United refused.

They chose profits over patients – again.

Now, Medicare Advantage members are being forced to delay treatment, pay out of pocket or scramble for new coverage. UnitedHealthcare made its choice. And patients are paying the price.
